Pavan2827t@gmail.com - +91 9845850502 - linkedin.com/in/pavan-p-4021b725b - github.com/Pavan-P45

## Summary

Computer Science and Engineering graduate who ships across the stack - Android (Kotlin, Jetpack Compose), full-stack web development (Node.js, Express.js, MongoDB, EJS), and applied ML (computer vision with ResNet). Hands-on experience with Generative AI tooling from an Android development internship. Currently deepening Data Structures & Algorithms in Java for backend/SDE roles.

## Education

**Dr. Ambedkar Institute of Technology, Bengaluru**

**2022 – 2026**

*B.E. in Computer Science and Engineering - CGPA/GPA: 8.6*

**Kiran PU College, Bengaluru**

**2020 – 2022**

*Pre-University Education (PCMC Stream) - Percentage: 95*

## Skills

**Programming Languages:** Python, Java, C, JavaScript, SQL

**Web Technologies:** HTML5, CSS3, JavaScript, Node.js, Express.js, REST APIs

**Database & Tools:** MongoDB, MySQL, Firebase, Git, GitHub, VS Code, Android Studio

**Android Development:** Kotlin, Jetpack Compose, Firebase Integration, Google Maps API, GPS Services

**Core Concepts:** Data Structures and Algorithms, DBMS, OOPs, Computer Networks, Operating Systems

## Experience

**MindMatrix**

**Feb 2026 – May 2026**

*Android App Development Intern (Generative AI)*

*Online*

- Built Android application features end-to-end using Kotlin and Jetpack Compose, focusing on responsive, modern UI components.
- Integrated Firebase for backend connectivity, authentication workflows, and real-time application functionality.
- Explored Generative AI capabilities for mobile apps using Google Cloud Labs and Google AI Studio, prototyping GenAI-driven features within the app.
- Debugged, tested, and enhanced application builds following industry-standard Android development workflows.

## Projects

### YelpCamp - Full-Stack Campground Platform

- Built a full-stack web application enabling users to explore, create, edit, and review campgrounds, with secure user authentication and authorization.
- Implemented complete CRUD functionality for campgrounds and reviews using Node.js, Express.js, MongoDB, and Mongoose.
- Integrated Passport.js for session-based authentication and Cloudinary for image upload and storage.
- Technologies: Node.js, Express.js, MongoDB, Mongoose, EJS, Passport.js, Cloudinary - GitHub: [github.com/Pavan-P45/Yelpcamp](https://github.com/Pavan-P45/Yelpcamp)

### Paryavaran Kavalu - Smart Waste Management Application

- Built an Android app enabling citizens to report public waste issues via image uploads and GPS-based location tagging.
- Designed separate user and admin modules to handle complaint management, waste monitoring, and status updates.
- Integrated Google Maps API and Firebase for real-time data storage, authentication, and location-based reporting.
- Technologies: Kotlin, Firebase, Google Maps API, GPS, Android Studio - GitHub: [github.com/Pavan-P45/Paryavaran-Kavalu](https://github.com/Pavan-P45/Paryavaran-Kavalu)

### T-Shirt Shopping Web Application

- Built a full-stack e-commerce platform for browsing products, managing cart items, and placing orders online.
- Implemented admin functionality for product management, inventory updates, and customer order handling.
- Engineered backend REST services and MongoDB data operations using Node.js and Express.js.
- Technologies: MongoDB, Express.js, Node.js, HTML, CSS, JavaScript - GitHub: [github.com/Pavan-P45/Online-T-Shirt-Booking](https://github.com/Pavan-P45/Online-T-Shirt-Booking)

### Human Action Recognition System

- Built a real-time human action recognition system using deep learning and computer vision for webcam-based activity detection.
- Trained a ResNet model to recognize and classify human actions from continuous video frames.
- Engineered a real-time inference pipeline for live webcam frame processing and prediction visualization.
- Technologies: Python, OpenCV, Deep Learning, ResNet, Computer Vision

## Certifications

**The Web Developer Bootcamp 2026 – Udemy (Instructor: Colt Steele)**

**Sept 2026**

*74-hour certification covering full-stack web development (HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, EJS, REST APIs – MERN stack)*

## Soft Skills

Problem Solving, Communication, Team Collaboration, Time Management, Adaptability, Self-Motivated Learner
